

Steering Wheel Control Interface

For Volvo vehicles with CAN Bus steering controls

CP2-V053

The CP2-V053 is designed to retain the steering wheel controls on Volvo vehicles with CAN Bus steering controls.

The CP2-V053 retains the built-in steering wheel controls in vehicles when replacing the factory radio with an aftermarket radio. It is compatible with today's most popular Volvo vehicles. The simple to use module can be configured in multiple ways, via DIP switches, or direct from a USB connected PC. Wiring and vehicle configuration switch settings are provided through the ControlPRO APP, available for PC, Android and iOS devices. The CP2-V053 is designed to be easy to use and time saving.

SRP: £30.00

UPC: 5032296064836
