

MAD PM2

PM2-54

MADE TO PLAY LOUD

WE PLAY LOUD!!

We know what you want. You want it LOUD, and that is exactly what we do, what we live for. Vibrations, gut-punches and straight up loud music - that's what makes us tick. We won't dress up in fancy words or claim to be something we're not. We are the NO BULLSH!T car audio brand!

Every single product with the GAS logo on it is born out of passion, the same that has driven us for two generations and that will keep us rolling up to your neighbourhood, winning and pushing the limits for many generations to come!

It's up to you to choose your own level of loud, and if you don't like what we do that's OK. You are welcome back when you've had your first true GAS experience. We don't exclude, we don't judge and we do not make up any excuses for who we are.

We are GAS and we are proud to be LOUD!

SAFETY

PLAY LOUD & SAFE. Read through this information, follow the instructions and save the manual for future usage and reference.

Make sure to pay attention to the instructions when you see this symbol: 

Do not expose the wiring to your new speaker to excessive damp or moisture. If the speaker's wiring is exposed it might result in electric failure, shock or damage to the product. Servicing is required when the product has been damaged in any way and/or doesn't operate normally. Refer all servicing to qualified service personnel only.

Keep the cables inside the vehicle separate from sharp edges or components that may be affected or take damage. Follow the recommended cable sizes and always use high quality cables and accessories. Even if you're eager to put the speakers to use – take no shortcuts when installing the cables, make sure that all connectors are protected and secured.

Do not drill any holes without checking what lies beneath, and don't cut anything without making sure that no important components risk being damaged.

There is a first time for everything, if you need help - ask a friend or contact your local GAS AUDIO POWER dealer/installer.

We want you to experience your product's MAD sound, but we don't want you to injure yourself or others. Use common sense, respect high pressure levels and volume, and follow your local laws and regulations.

These speakers are not woofers. The speakers should be crossed over as midrange speakers to protect them from damage (deep bass).

Recommended cross over:
HPF @ 100-140Hz (12dB/Oct) for PM2-54

UNPACKING

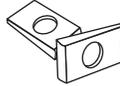

Unboxing your new MAD product is an experience, make sure that the speakers and all the accessories are included in the packaging:

Speakers
(2pcs)

Manual
(1pc)

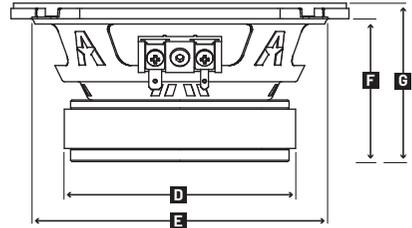

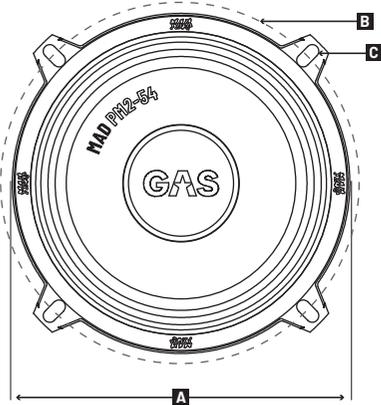

V-type clips
(8pcs)

Screws
(8pcs)

DIMENSIONS

	A	B	C	D	E	F	G	
PM2-54	130	Ø138	5x10	92	113	56	63	mm

SPECIFICATIONS

Below you'll find the specifications that has been checked and tested in our workshop. The specified sensitivity isn't directly connected with the sound pressure in the vehicle, and shouldn't be used as the sole indicator for comparison with other speakers.

MAD PM2-54	
Component	SPL Midrange
Woofer size	5.25" (130mm)
Nominal impedance	4 Ohm
Power RMS	75W
Power MAX	150W
Freq. response	100-13 000Hz
Sensitivity	92dB
Voice Coil	1.2" KSV
Woofer cone	Reinforced pressed paper
Woofer basket	Steel
Woofer suspension	2R cloth surround
Woofer magnet	HQ Ferrite
Woofer spider	Polycotton
Vas	2.52 L
Qts	0.85
Qes	0.93
Qms	5.08
Re	3.40 Ohm
Fs	119.7 Hz

FEATURES

The MAD midrange speakers are made to be LOUD and last for years to come. We want to help you and your vehicle to be as LOUD as possible. We've made sure that is the case by using innovative and groundbreaking techniques that increase durability.

NEXT LEVEL LOUD

Ready to take a stand? The MAD PM2 midrange drivers are here to stay and to make sure you show everyone how LOUD you can be. SPL is not just a couple of midrange drivers and horn tweeters that will wake up the neighbors in the next area, it's a lifestyle! If you're ready to take the next step into the wonderful world of SPL, this is the product for you.

WE MADE SPL SOUND GOOD

Bigger is better, that's just how it is. The bigger and more powerful magnet creates midrange drivers that can produce A LOT of sound. If you're going to crank that volume dial to the max, you will want it to sound good. We added a copper shorting ring just for this purpose, which lowers the distortion, because we care about your ears! SPL is a lifestyle as we said, so as soon as you have installed your first pair of PM2 you will want to add two more and two more after that, and that's OK. The SPL addiction is real!

POWER OF PAPER

We're referring to the pressed paper cone, of course. The MAD PM2-54 is made for playing your favorite music, as LOUD as possible. We wanted this midrange driver to take it to the next level, so we added a bigger (1.2") voice coil. When testing this crazy driver we noticed one thing: for that extra durability, the paper cone needed to be reinforced - which it has!

DOING IT THE SPL WAY

You can do better than two speakers. Come on! More is always better, and we want you to be as LOUD as you possibly can. To make this easier, we've placed two gold plated terminals on the speaker. This makes it easier to add a speaker to your setup, or a tweeter. The choice is yours, but be sure to make a kickass build that'll make GAS proud.

HOW TO

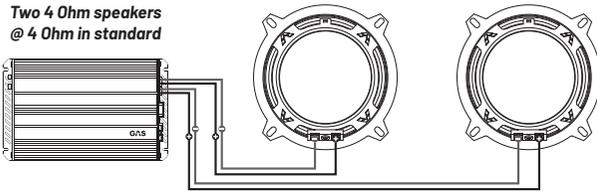

INSTALL SPEAKERS

Before installing your brand new speakers, make sure that you have everything you need. Have the right tools ready, and make sure that you have the necessary knowledge/skill to perform the installation properly. Preparation and knowledge is crucial!

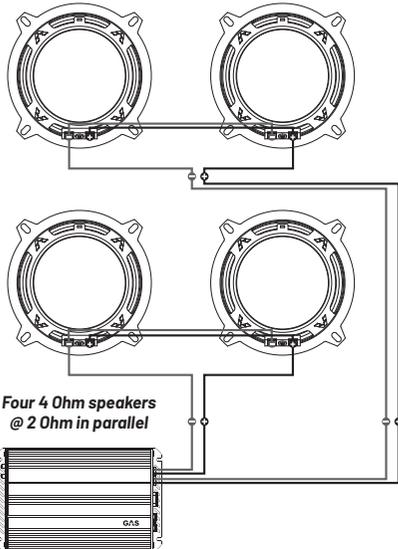

The MAD PM2 series uses a single 4 Ohm voice coil. If you want to connect four or more PM2 series speakers, you can vary the impedance by altering the wiring configuration to use a series or parallel setup. The more the merrier!

Make sure to look through the recommended wiring schematics below and choose the setup that corresponds with the number of speakers in your sound system. Take note of the impedance stability of your amplifier. Don't be afraid to consult your local GAS AUDIO POWER dealer/installer if you have any questions.

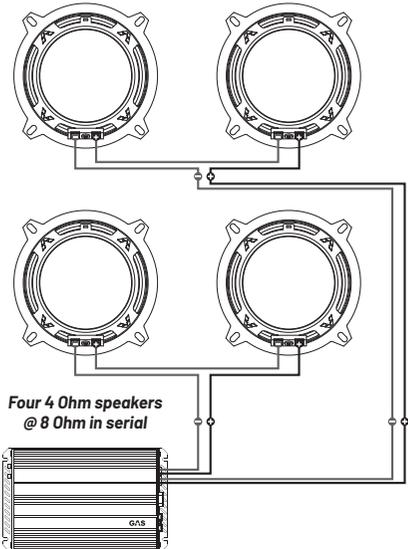

**Two 4 Ohm speakers
@ 4 Ohm in standard**

 It is important to know the limits of your amplifier. Be sure to connect your sound system with a suitable impedance to optimize your sound system.

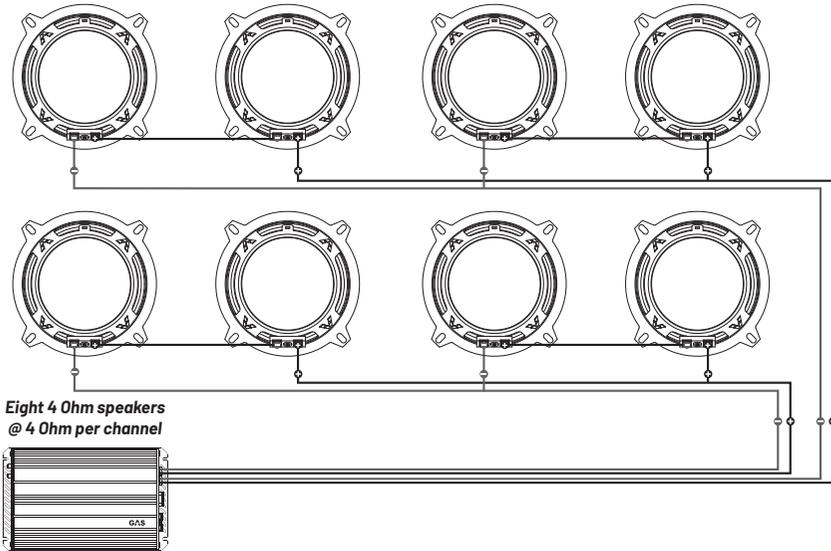

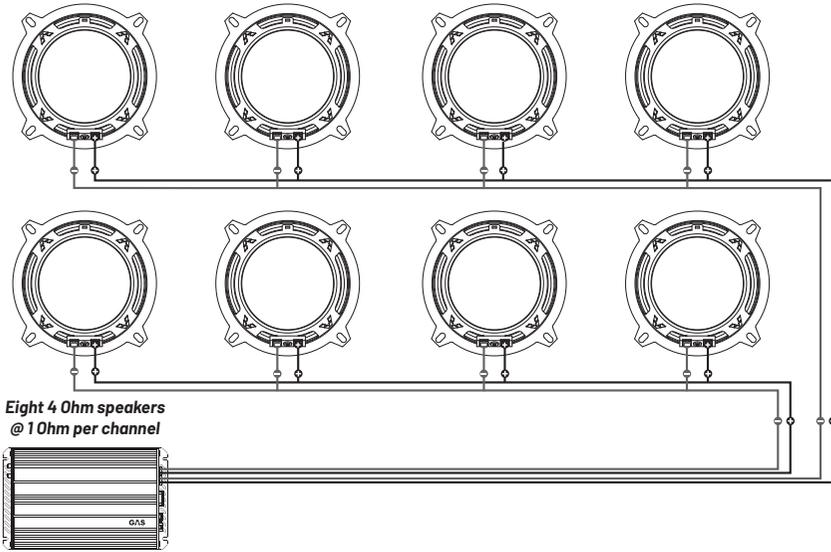

**Four 4 Ohm speakers
@ 2 Ohm in parallel**

**Four 4 Ohm speakers
@ 8 Ohm in serial**

HOW TO

TROUBLESHOOTING

NO POWER/SOUND

Check the speakers to make sure they're not damaged. If your speakers don't get any power, the most common issue is either in the wiring or in the amplifier. Use a multimeter to measure the amplifier's voltage on the +12V terminal and the remote signal terminal. Use a multimeter to make sure that you have a negative ground connection. Check the built-in fuse (if there's one) on the amplifier. If there's no power coming through - control the fuse on the power cable. If it's intact - make a full check of the wiring to ensure cable integrity.

Check all the speakers connected to your sound system. Check all the speaker cables and all the signal cables. Check your head unit to make sure no settings are limiting the amplifier's functions or the speakers. When all of the above has been tested/looked over, and all is as it should be but there's still no sound, consult your local GAS AUDIO POWER dealer/installer.

UNWANTED NOISE

Start by looking over the speakers in the sound system so there is no damage or connection issue with the wiring. Make sure that your signal cables or speaker cables aren't too close to the power cables. Check your amplifier's grounding point and make sure that the surface is clean. When all of the above has been tested/looked over, and the unwanted noise does not vanish, consult your local GAS AUDIO POWER dealer/installer.

DISTORTION

Start by looking over the speakers in the sound system so there's no damage or connection issue with the wiring. Check the speaker cables to make sure that the polarity isn't reversed on one channel. Check the settings on the amplifier, make sure that the gain/level is set according to the amplifier's instructions. If your amplifier has a boost function, lower its effect or turn it off.

WARRANTY & DISPOSAL

This product is covered by warranty, depending on the conditions in the country where it's sold. If the speaker is returned for service, please include the original dated receipt (or a copy) with the product. Make sure that the head unit is packaged properly and secured, preferably in its original packaging.

The crossed-out wheeie bin symbol means that the product, literature and packaging included must be taken to separate collection at the end of their working life. Don't dispose of these products as unsorted municipal waste: take them for recycling. For info on your nearest recycling point, check with your local waste authority.

This product has been granted with the CE certification mark to show that the product follows the health, safety, and environmental protection standards for products sold within the European Economic Area (EEA).

GAS Audio Power products comply with the relevant provisions of the RoHS Directive for the European Union. In common with all Electrical and Electronic Equipment (EEE) the product shouldn't be disposed of as household waste. Alternative arrangements may apply in other jurisdictions.

GAS Audio Power is a global partner of the European Mobile Media Association, an organization that focus on promoting the custom made mobile media installations to consumers.

THE GAS WORLD

You've entered the world of GAS. We aim to please, and we've made sure to have products made for you. No matter what stage of the LOUD-addiction you might find yourself in, there is a GAS product to fill your need.

MAD

Just starting out? The MAD series is made to play LOUD and to be the express lane to a no bullsh!t sound system that will make sure everyone can hear you coming!

MAX

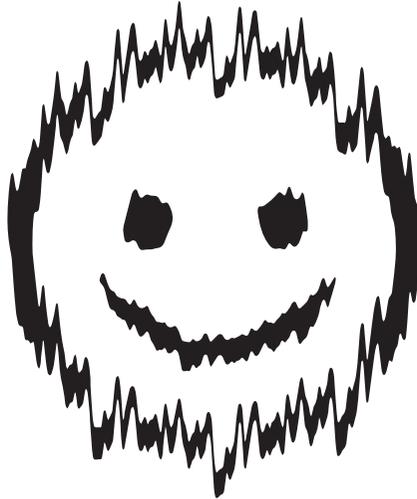

The MAX series holds products made to deserve the center stage. Powerful, heavy duty and designed to be noticed. We made NO COMPROMISES because we know that you wouldn't accept it.

CMP

The CMP series has been developed for the crucial seconds when the dB-counter starts to tick. All CMP products have hand-picked, high quality, COMPETITION GRADE components and they are specially designed to withstand an awesome amount of power.
